

Preservative Free Dry Eyes Single Dose Eye Drops

Uses

Provides effective relief, moisturising and soothing dry and tired eyes. They contain sodium hyaluronate, a natural substance found in the eye, which forms a protective layer over the surface of the eye, trapping in moisture and preventing the eye from drying out. Preservative-free and gives fast relief to dry eyes associated with contact lens wear, computer use, central heating, air conditioning or when travelling.

Dosage

Use as often as needed throughout the day. Apply a few drops into each eye and blink several times. To improve the comfort of wearing contact lenses, apply a few drops to the inside surface of the lens before insertion.
