

KELO-COTE UV

Uses

For the treatment and prevention of old (up to 4 years) and new hypertrophic and keloid scars resulting from burns, general surgical procedures and trauma wounds. Helps to soften and flatten raised scars and reduce redness or discolouration associated with them. Contains SPF30 to protect scars against the aggravating effects of the sun by preventing redness and discolouration.

Dosage

Adults and children aged 3 months and over: apply twice daily, 30 minutes before sun exposure. Provides skin with 24-hour protection with twice a day application. The recommended minimum treatment time is 60-90 days. Continued use is recommended if improvement is still seen after the initial 90 days.
