Uses

For the short-term treatment of bedtime pain, for example rheumatic and muscle pain, backache, toothache, migraine, headache and period pain that is causing difficulty getting to sleep.

Format and Ingredients

Tablet containing:

Paracetamol 500mg, Diphenhydramine Hydrochloride 25mg,

Dosage

Over 16 years: 2 tablets 20 minutes before bedtime. Maximum daily dose 2 tablets in 24 hours. Other products containing paracetamol may be taken for daytime pain relief but at a reduced maximum dose of 6 tablets in 24 hours. The dose should not be repeated more frequently than every 4 hours. Not to be taken for more than 7 consecutive nights without consulting a doctor. Under 16 years: not recommended except on medical advice.
