Lyclear Dermal Cream

Uses

For the treatment of infestations of scabies and crab lice on the body. Children up to 23 months should only be treated under close medical supervision.

Dosage

To treat scabies: Adults and adolescents over 12 years: apply up to 30g of cream. Repeat 7-14 days after the first treatment. 6-12 years: apply up to 15g of cream and repeat after 7-14 days. Children 2 months - 5 years: apply up to 7.5g of cream and repeat after 7-14 days. Children up to 23 months should only be treated under close medical supervision. Not suitable for infants under 2 months, unless advised by a doctor. To treat crab lice: Adults over 18 years: apply up to 30g of cream. Any facial hair and eyelashes should be checked for live lice and eggs. Cream should be applied to any facial hair, carefully avoiding eyes. If live lice or eggs are found on the eyelashes, they should be removed carefully using tweezers. Cream should not be applied to the eyelashes.
