

Dioralyte Sachets

Uses

Oral rehydration treatment to help replace lost fluids and body salts (electrolytes) when dehydrated. Available in Blackcurrant, Citrus and Natural flavours.

Dosage

Adults: contents of 1 or 2 sachets after every loose motion.
Children: 1 sachet after every loose motion. Infants up to the age of 2: one to one and a half times the usual 24 hour feed volume of Dioralyte Solution under medical supervision.
Dissolve contents of 1 sachet in 200ml of drinking water. For infants, and when drinking water is unavailable, use freshly boiled then cooled water. Infants under 2 years with diarrhoea should be seen by a doctor as soon as possible.
