Eumovate Eczema & Dermatitis 0.05% Cream

Uses

For the short-term treatment and control of patches of eczema and dermatitis, including atopic eczema and primary irritant and allergic dermatitis.

Dosage

Adults and children 12 years and over: apply sparingly to the affected area twice a day for up to 7 days. If the condition does not improve, or becomes worse in the first 7 days, medical advice should be sought. Medical advice should also be sought if an improvement is seen in 7 days but further treatment is required. Children under 12 years: not recommended, except on medical advice.
