

## NiQuitin Mint 2mg, 4mg Lozenges

### Uses

For relief of nicotine withdrawal symptoms including cravings associated with smoking cessation. 2mg Lozenge: for those who smoke more than 30 minutes after waking. 4mg Lozenge: for those who smoke within 30 minutes of waking.

### Dosage

Lozenges should be used whenever there is an urge to smoke. Adult smokers 18 years and over: weeks 1-6: at least 9 lozenges but no more than 15 lozenges a day. Gradually reduce so that by week 12, 1-2 lozenges a day are used only on occasions when strongly tempted to smoke. A healthcare professional should be consulted if unable to make a permanent quit attempt after 6 months. Allow lozenge to dissolve in the mouth, occasionally moving it from one side to the other until dissolved (about 20-30 minutes). Do not chew or swallow whole. Adolescents (12-17 years): use only on the advice of a healthcare professional. Under 12 years: not recommended.
