

Acnecide Face 2.5% w/w Gel

Uses

Topical therapy for the treatment of mild acne affecting the face, when comedones (blackheads and whiteheads) predominate, and there are few or no papules and pustules (acne spots and pimples) and no inflamed spots.

Dosage

Adults and adolescents 12 years and over: before use, clean and dry skin carefully. When first used, apply in a thin layer once daily to affected areas before going to bed. After 2-3 days, if well tolerated, application frequency can be increased to twice daily, morning and evening. Those with sensitive skin should apply once daily before going to bed. The extent of any drying or peeling may be adjusted by modifying the dosage schedule.
