

Daktarin®

Sugar Free 2% ORAL GEL
miconazole

For superficial fungal infections of the mouth & throat

15 g

Daktarin Sugar Free 2% Oral Gel

Uses

For oral treatment of superficial fungal (e.g. candida) infections of the oropharynx in adults and children 4 months and older.

Dosage

Adults and children 2 years and over: 2.5 ml ($\frac{1}{2}$ measuring spoon). Infants 4-24 months: 1.25 ml ($\frac{1}{4}$ measuring spoon). Each dose to be given 4 times a day after meals. Treatment should be continued for at least a week after symptoms have disappeared.
