Panadol NightPain

Uses

For short term treatment of bedtime pain, for example rheumatic and muscle pain, backache, toothache, migraine, headache and period pain which is causing difficulty in getting to sleep.

Dosage

Over 16 years: 2 tablets taken 20 minutes before bedtime. Maximum daily dose 2 tablets in 24 hours. Other products containing paracetamol may be taken for daytime pain relief but at a reduced maximum dose of 6 tablets in 24 hours. The dose should not be repeated more frequently than every four hours. Not to be taken for more than 7 consecutive nights without consulting a doctor. Under 16 years: not recommended except on medical advice.
