Earex Advance Ear Drops

Uses

Softens and removes hardened ear wax. Helps reduce the need for syringing.

Dosage

Adults: tilt the head to one side and release 3-6 drops into the auditory canal. Keep head tilted and with the help of a cotton ball or a handkerchief keep in the ear for a few minutes but no more than 10 minutes. Gently remove the liquid coming out of the auditory canal and rinse gently with lukewarm water to remove the remaining ear wax. Repeat twice daily for the removal of ear wax or once a week to prevent build up. Suitable for children following medical advice.
