Calgel Teething Gel

Uses

For relief of pain and discomfort associated with teething in children from 5 months of age, where non-pharmacological treatments have failed to provide sufficient relief. It also has mild antiseptic properties.

Dosage

Babies from the age of five months: rub a pea-sized blob of gel to a clean finger tip and spread gently onto the sore area of gum. The dose may be repeated if necessary after 3 hours, up to a maximum of 6 doses in 24 hours. For short term use of no more than 7 days.
