

## Curanail 5%w/v Medicated Nail Lacquer

### Uses

For the treatment of mild cases of distal and lateral subungual onychomycoses caused by dermatophytes, yeasts and moulds, limited up to two nails.

### Dosage

18 years and over: apply to the affected nail(s) once weekly. Remains effective under nail polish – apply 10 minutes after application of Curanail. Treatment duration depends on intensity and locality of infection, but fingernails usually require 6 months and toenails 9-12 months. A review of treatment is recommended at intervals of approximately 3 months.
