

Movicol Powder Sachets

Uses

Treatment of chronic constipation and faecal impaction.

Dosage

Adults and the elderly: Chronic constipation: 1-3 doses per day according to individual response. For extended use, adjust dose down to 1 or 2 doses. Faecal impaction: 8 sachets daily, all of which should be consumed within a 6 hour period. The 8 doses may be dissolved in a litre of water. A course of treatment does not normally exceed 3 days. Children: not recommended.
