

Acnecide Face 5%w/w Gel

Uses

Topical treatment for mild acne affecting the face.

Dosage

12 years and over: cleanse skin with a gentle cleanser and dry carefully. Apply a thin layer of the gel once daily to the acne-affected areas of skin before going to bed. After 2-3 days, if the treatment is well tolerated, application can be increased to twice daily, morning and evening. The extent of any drying or peeling may be adjusted by modifying the dosage. Using a moisturiser after application can help to reduce any irritation the treatment may cause.

Format and Ingredients
