Lovima 75 microgram film-coated tablets

Uses

Oral contraception for women of child-bearing age, including adolescents.

Dosage

The first tablet should be taken on the first day of menstrual bleeding. Thereafter, 1 tablet should be taken each day at the same time so that the interval between 2 tablets is always 24 hours. Tablets should be taken continuously. When one pack of tablets is finished, a new pack should be started the next day without a break.
