

Care Co-Lactase Infant Drops

Uses

To reduce lactose content in milk. Suitable for both breast and formula milk. Suitable for use from birth.

Dosage

Breast feeding: express a few tablespoons of breast milk into a small sterilised container. Add 4 drops and give to the baby on a sterilised plastic spoon or using a syringe and continue breast feeding as normal. Infant formula: make the baby formula according to the manufacturer's instructions. Add 4 drops to the formula at room temperature. Shake the formula and feed as normal. Discard any unused formula. Expressed breast milk: defrost the milk if necessary and warm to feeding temperature. Add 4 drops to the milk when warm.
