Salatac Wart Gel

Uses

For the topical treatment of warts, verrucas, corns and calluses.

Dosage

Adults, elderly and children: apply once daily, at night. Treatment can take up to 12 weeks. Every night, soak the affected site in warm water for 2-3 minutes then dry thoroughly. Apply 1-2 drops of gel to the lesion and allow to dry. Take care to avoid spreading onto surrounding normal skin. The following evening, carefully remove and discard the elastic film from the previous application, and reapply the gel. Once a week, gently rub away the treated surface using an emery board or pumice stone before reapplying the gel.
