

Fybogel Hi-Fibre Orange

Uses

For patients requiring a high fibre regimen: for example, for the relief of constipation, including constipation in pregnancy and the maintenance of regularity. Also for the management of bowel function in patients with haemorrhoids.

Dosage

Over 12 years: contents of 1 sachet stirred into a glass of water morning and evening after meals. Children 6-12 years: half to 1 level 5ml spoonful stirred into water, depending on size and age, morning and evening. Children under 6 years: not recommended. Should be taken as soon as possible after mixing the granules.
