Dentinox Teething Gel

Uses

For relief of pain and discomfort associated with teething in children from 5 months of age, where non-pharmacological treatments have failed to provide sufficient relief.

Dosage

Infants from 5 months: apply a pea-sized amount of gel to a clean fingertip and spread gently onto the sore area of gum. The dose may be repeated if necessary after 3 hours, up to a maximum of 6 doses in 24 hours. Treatment should be stopped once symptoms have resolved. Not to be used for more than 7 days.
