Tablet marked 'avomine' on one side and scored on the other containing:

Promethazine Teoclate 25mg,

Dosage

Adults: Prevention of travel sickness on long journeys: 1 tablet to be taken each night at bedtime starting on the night before travel. Prevention of travel sickness on short journeys: 1 tablet taken one or two hours before travel. Treatment of travel sickness: 1 tablet as soon as sickness is felt followed by a second tablet the same evening. A third tablet may be taken the next evening. Nausea and vomiting due to other causes: 1 tablet at night is often sufficient, more frequently twice or three times daily if required. Maximum 4 tablets in 24 hours. Children over 10 years: the lower adult dose. Children 5-10 years: half the adult dose (half a tablet) at the same time as for adults. Not recommended under 5 years.
